FK	SERIAL	Item_ID

Concessions		
PK	SERIAL	Item_ID
	VarChar150	Description
	Int	Price

The overall idea is to have everything tie into the tickets table. This will allow a single point of reference based on something everyone would need to come through the doors. While concessions is added and attached as well, myself and the other teachers I discussed this with feel that the concessions table is a worthwhile table to have. It does not seem to fit since we would allow anyone to buy concessions even without a ticket and it does not seem to be something we would want to track in this fashion.
